

SMART CITIES FOR YOUNG GENERATIONS. SECURE, GREEN, DIGITAL

Co-financed by
European Union

Smart Cities for young generation Project's update.

Ladies and Gentleman,

We are pleased to announce that we have successfully reached the the first milestone of the planned activities of the „Smart City for young generation”, a project financed by the National Agency of the Erasmus+ Programme. In accordance with the schedule, our international team of experts from all partnering organisations has finished work on The Guide for Educators and competency map.

The Guide for Educators will help introduce Educators to the SMART CITY issues and ensure their proper understanding, regardless of their knowledge or experience in this field. Particular emphasis has been placed on three areas of SMART CITY operation: Cybersecurity, Open Data and the Digital Society, Green Energy and the Circular Economy.
