

NETWORKING MISSION TO WARSAW - POLAND

DATE: 29.01.2024 - 31.01.2024

MAZOVIA - POLAND'S HEART OF DEVELOPMENT

Mazovia is one of the most economically diverse regions in Poland. It is home to a wide range of industries, including manufacturing, services, finance, and agriculture. The region's economic base is diversified, which contributes to its resilience and stability. Warsaw, being the capital of Poland, is the financial and economic centre of Mazovia and the entire country. Mazovia has a well-developed manufacturing sector, with companies involved in sectors such as automotive, electronics, machinery, and chemical production. The region's central location and well-developed infrastructure make it attractive for manufacturing and distribution companies.

MAZOVIA CLUSTER ICT, KEY NATIONAL CLUSTER - YOUR GATEWAY TO COLLABORATIVE EXCELLENCE

MCICT is the premier cooperation platform that brings together over 400 dynamic companies employing 300,000 skilled professionals, generating more than Euro 5 billion in revenues. In addition, we collaborate with 6 cutting-edge R&D institutions, and 3 investment funds, and engage with both local and central administration to create a thriving ecosystem for innovation and growth.

CORE ACTIVITY

Our Core Activity is to initiate, create, and manage Polish and International Project Consortia with the active participation of our members and international partners. We are the driving force behind innovative projects that fuel economic growth, technological advancement, and sustainable development.

MAIN AREAS OF COMPETENCE

Our main areas of competence including:

- Green Energy - Smart Grid –Smart City: We are at the forefront of sustainable energy solutions, pioneering smart grid technologies, and creating smarter, more sustainable cities for a greener future.
- Business System Solutions and Industry 4.0: Stay competitive in the digital era with our expertise in business system solutions and Industry 4.0, driving efficiency, automation, and growth for your business.
- Fin-tech & Med-tech: Explore the future of finance and healthcare with us. We are revolutionizing these sectors through innovative financial technology and cutting-edge medical technologies.
- Aerospace & GIS: Reach for the skies with our aerospace expertise, and harness the power of Geographical Information Systems (GIS) for enhanced decision-making and problem-solving.
- Environmental Protection and Agriculture: We are committed to a sustainable future. Our cluster actively contributes to environmental protection and agriculture, creating solutions for a cleaner, more efficient planet.
